container and away from moisture.**

Registration Number: 2016009A Fertilizers Act

DIRECTIONS FOR USE

General Application Rate(All Crop Types):

250ml per acre at recommended dilution rates

Dilution Rates(All Crop Types):

Foliar Spray: The dilution rate should be 1:1000

Bare Soil/In Furrow: The dilution rate should be 1:100

Mixing Instructions:

Do not premix! Add clean water then add ZumSil at recommended rate.

Mix well. Apply within 4-8 hours.

Do not mix with acids as product is highly alkaline and can react.

**For proper agronomic application rates for your crop, soil type, and climate please
consult with a local crop advisor, farm advisor, or agronomist.**
